

Vigenere Decipher Dash

How to decrypt with disc:

Using the first letter of the keyword provided, look for it on the inner disc and match it with the outer disc letter “A”(starting point) . Find the first letter of the regular message on the inner disc and find the corresponding letter on the outer disc. Do this for all the letters of the secret code.

Decrypt the following ciphertext (secret code) into plaintext (regular message) using the keyword:

Ciphertext - Q D I S P G J S Z U N B D

Keyword- SPRING

Ex. with first letter of the ciphertext -----> Q
first letter of keyword -----> S

Match the letter “S” on purple disc (inner disc) with the yellow’s disc(outer disc) letter “A”
Now look for the letter “Q” on purple disc and find the letter on the yellow disc that corresponds

THE LETTER IS “Y”

Hint # 1 * the keyword **must** be the same length as ciphertext *

What is the Plaintext? Write it below!

Plaintext- Y ___ ___ ___ ___ ___ ___ ___ ___ ___ ___ ___
